Introduction

1. Families of Schools: the eighth edition

Families of Schools continues to be well received in London. We have been working with schools and education professionals across London to develop this eighth edition for 2011. As with previous years, this edition includes GCSE results with and without English and maths, a Contextual Value Added (CVA) measure and contextual families focusing on English as an Additional Language (EAL) and mobility.

2. How have families been grouped?

Schools are grouped into families based on an average of prior attainment data and context data. Prior attainment data is the Average Key Stage 2 (KS2) Point Score (APS) for all pupils in Year 7 to Year 11 matched to Key Stage 4 data. Context data includes:

- Income Deprivation Affecting Children Index (IDACI) data, calculated by linking individual pupil postcodes to IDACI data and compiling an average figure for each school¹.
- The proportion of pupils eligible to receive Free School Meals (FSM).
- The IDACI and FSM school averages are combined to give an overall indicator for the School Environment (SE).
- The percentage of pupils whose first language is known or believed to be other than English (EAL).
- A mobility measure, defined as the percentage of pupils in Year 10 or Year 11 who have joined the school within the last 2 years (L2Y).

Schools are grouped into families on the basis of all four factors. The factors are used in proportion to their impact upon Key Stage 4 (KS4) outcomes, with weightings being:

- APS (66%)
- SE (20%)
- EAL (10%)
- L2Y (4%)

When developing the 2011 families an overall aim was to retain existing families where possible although some families have changed to accommodate new schools and to allow schools to move families if they had become outliers within their existing family.

¹ The IDACI is a measure that takes account of different dimensions of deprivation such as housing, education and health. The school IDACI measure reflects the proportion of children living in low income households in the areas that the pupils live in. This is calculated by matching the individual postcodes of children attending each school to the IDACI, which measures the scale of deprivation in each postcode in the country, and compiling an average IDACI figure for each school.

4 Families of Schools

An outlier is defined as having a Key Stage 2 APS measure that is more than one standard deviation from the mean Key Stage 2 APS for the family, thus ensuring that all schools within the family differ by less than two standard deviations.

Schools identified as outliers within their existing families, together with new schools, were then allocated to families using the following process:

- An overall score for each school was calculated using the weightings outlined earlier.
- Schools that needed a new family were then allocated to the same family as the schools with the overall score closest to their own.

Following this allocation process, a small number of schools remained as outliers on Key Stage 2 APS within their allocated family and where possible, manual adjustments were made to reduce the number of outliers.

The data used for this publication is based on the schools that were open in January 2010. This means that it includes some schools that subsequently closed and does not include a small number that have opened since then.

3. The Families of Schools main graph

This graph plots data for every secondary school in the 23 London Families of Schools. It shows the average prior attainment of pupils at each school (an average of the KS2 APS for all pupils in years 7 to 11) on the Y-Axis and a measure of the school context or school environment on the X-Axis (an average of the proportion of pupils eligible for FSM and the proportion of pupils living in low income households, as defined above using IDACI). The graph shows how the schools are grouped into families and how the schools within each family have broadly similar characteristics.

4. Contextual families

Contextual families bring together schools in London with the highest proportion of mobile pupils and highest proportion of pupils with English as an Additional Language (EAL), enabling schools to compare themselves and share their experiences with others, in a similar way to the main families. Schools within these families also tend to have similar Free School Meal and prior attainment statistics. The creation of these families simply recognises that schools providing for large proportions of pupils with these characteristics are likely to share some issues and experiences, and may benefit from making links with other similar schools.

The Families of Schools main graph

1 An average of the Key Stage 2 APS for all pupils in years 7 to 11.

2 An average of the proportion of pupils eligible for FSM and the proportion of pupils living in low income households as defined opposite using IDACI.

Using the Families of Schools document

The data presented here enables you to compare the outputs of your school against the outputs of other London schools with statistically similar pupil intakes. There are many ways in which you can analyse and use the data.

1. Finding a school

To locate your school, you should refer to the list of schools in Annex 2 at the back of this document. All schools are listed in alphabetical order in a grid that shows to which family the school belongs. Data for your school will be shown on the appropriate family pages.

2. Making comparisons with other schools

The Families of Schools resource is designed to enable you to compare data about your school's characteristics, improvement and performance with that of other schools. When making comparisons, you are encouraged to look at schools within your family and also at neighbouring families. This is particularly relevant to schools appearing in the middle families.

3. What does the data show me?

i. School characteristics

The school characteristics table shows how the characteristics of the pupil population in individual schools compare across the family.

CHARACTERISTICS OF SCHOOLS AND THEIR PUPILS									
School Designation		F	F	C	C	F	F	VA

Example extracted from Family 1

[#] See Annex 1

ii. Tracking schools' improvement over time using the performance map

Within each family page, a performance map presents schools' average attainment and improvement over three years. The rate of improvement is based on the average yearly change over three years in terms of the percentage achieving 5+ A*-C including English and maths, and the attainment figure is an average of the schools' 5+ A*-C including English and maths percentage over the last three years. A fully labelled performance map is shown below. Schools with less than four years of data will not be shown on the performance map. Four years of data (2006-07, 2007-08, 2008-09 and 2009-10) are needed to calculate improvement rates over the three years, if the required data is not available the school will not be plotted on the performance map.

- School A is a school with **below** average attainment and **below** average improvement
- School B is a school with **below** average attainment but with **above** average improvement
- School C is a school with **above** average attainment and **above** average improvement
- School D is a school with **above** average attainment and **below** average improvement

iii. School attainment data

This table can be used to compare attainment levels and Contextual Value Added (CVA) data for schools in each family. Although all schools within the family have similar pupil intakes the results at the end of KS4 vary by school.

For example, a much greater percentage of pupils in School 1 achieved 5 or more grades A*-C at GCSE, including English and maths, than School 2.

		School 1	School 2				
SCHOOL ATTAINMENT DATA							
Percentage of pupils achieving 5 or more grades A*-C at GCSE and equivalents	2008	46	58	57	56	57	57
	2009	53	62	60	58	69	57
	2010	70	62	60	60	69	74
Including English and Maths	2008	37	47	43	48	43	42
	2009	25	53	42	48	50	47
	2010	47	54	41	51	52	49
GCSE or equivalent Average Point Score per end of Key Stage 4 pupil (uncapped)	2008	326	376	393	348	390	331
	2009	360	394	421	354	431	340
	2010	432	414	418	419	417	397
Key Stage 2-4 Contextual Value Added		1002	998	993	999	987	1009
Key Stage 2-4 Value Added		1005	1017	1001	1003	989	1012
% of 15 year olds in school for 5 years or more		98	96	93	86	93	87
% of 15 year olds in school for 2 years or more		99	100	99	96	98	97
Total absence		7	6	8	8	8	8
Percentage persistent absence		5	5	8	8	8	8
Percentage achieving 5+ A*-A Grades		7	15	5	9	14	8

iv. Breakdown of attainment data

The tables then break down the attainment data by pupil characteristics, showing variations in attainment between schools for pupils with Free School Meals and by ethnicity and gender. This is particularly useful for identifying schools that are showing evidence of improving attainment for particular groups of pupils. For example, data in the

sample family table to the right allows us to compare attainment between

School 1 and School 2. Although the schools are in the same family, and therefore have similar intakes, only 25% of FSM pupils in School 1 achieved 5+ A*-C including English and maths compared to 50% of FSM pupils in School 2.

		School 1	School 2					
BREAKDOWN OF ATTAINMENT DATA								
Percentage of pupils at the end of Key Stage 4 achieving 5 or more grades A*-C (including English and Maths) at GCSE and equivalents	FSM	All pupils not eligible for FSM	48	54	42	53	56	52
		All pupils eligible for FSM	25	50	21	10	15	21
	Girls	All girls	46	60	45	53	62	58
		All girls not eligible for FSM	46	60	46	57	65	60
		All girls eligible for FSM	-	64	29	14	33	40
	Boys	All boys	48	48	37	49	42	44
		All boys not eligible for FSM	49	50	38	51	47	47
		All boys eligible for FSM	29	33	14	-	0	11
	Ethnicity	White British pupils	48	45	41	47	51	50
		Indian pupils	-	67	75	73	N/A	65
		Pakistani pupils	N/A	-	11	-	N/A	-
		Bangladeshi Pupils	N/A	-	-	N/A	N/A	N/A
		Black Caribbean pupils	-	27	-	41	-	25
		Black African pupils	N/A	-	N/A	N/A	-	N/A

N/A = 0 pupils, data unavailable or has been suppressed

- = fewer than 5 pupils in this group

v. GCSE subject information

The GCSE subject information can be used to compare subject level performance within families. The table shows the number of pupils entered for each subject, the percentage achieving an A*-C grade in that subject and the Average Point Score (APS) of the candidates taking that subject. The 'APS of

candidates' measure shows, for each cohort of pupils taking a particular subject, how well, on average, that group achieves in all the subjects they take at KS4. This is useful when looking at optional subjects, as the characteristics of pupils taking each subject may differ within (and between) schools.

GCSE SUBJECT INFORMATION							
Geography	Number	27	89	48	40	14	60
	Percentage	41	81	44	58	71	63
	APS of Candidates	469	461	374	474	448	419
History	Number	38	99	28	102	18	92
	Percentage	63	47	54	70	33	54
	APS of Candidates	498	442	383	485	432	418
				School 1		School 2	

This example data table shows that School 1 and School 2 have different strengths in geography and history. School 1 has a relatively successful history department – with 54% of pupils attaining an A*-C grade at GCSE compared to 33% of pupils in School 2. This is despite the fact that the pupils taking history in School 2 have better results across their other GCSE subjects compared to those in School 1 (an APS of 432 compared to 383 in School 1). By contrast, School 2 has a higher percentage of pupils achieving an A*-C grade in geography (71% in School 2 compared with 44% in School 1). However, some of this difference can be explained by the higher overall attainment of the pupils taking geography in this school (School 2's geography cohort achieved an APS of 448 compared to just 374 for the geography cohort in School 1).

vi. Contextual families

This example looks at schools with a high percentage of mobile pupils. School 1 and School 2 both have high levels of pupil mobility but they have recorded

SCHOOL ATTAINMENT DATA			
Percentage of pupils achieving 5 or more grades A*-C, at GCSE and equivalents	2008	39	40
	2009	54	34
	2010	58	35
		School 1	School 2

different trends in attainment at GCSE between 2008 and 2010. The results for School 1 have increased by 19 percentage points since 2008 whereas results for School 2 have fallen by 5 percentage points over this period.

London in context

The tables and charts on these pages show how London compares with the other City Challenge areas and the rest of England. This data helps set the information presented about each school and each family in the national context.

The **area characteristics** table shows the total number of full-time secondary school pupils in London, the two other City Challenge areas and the rest of England. It also shows how the characteristics of secondary school pupils compare between the areas.

The **area performance** table shows the different levels of attainment and value added in London, the two other City Challenge areas and the rest of England.

The **area subject information** shows how the total number of pupils entered for each subject, the percentage of the total who achieve an A*-C grade in that subject and the Average Point Score (APS) of each candidate taking that subject differ between London, the other City Challenge areas and the rest of England.

14 Families of Schools

All areas have seen an improvement in pupil attainment at Key Stage 4, with the proportion of pupils in London gaining at least 5 GCSEs at A*-C including English and maths improving by 4 percentage points between 2009 and 2010.

Percentage of pupils at the end of KS4 achieving 5+ GCSEs & equivalents at grades A*-C including English & Maths

The chart below highlights that over half of all secondary school pupils in London are from Black and Minority Ethnic Groups.

Ethnicity of secondary school pupils

Data on eligibility for Free School Meals shows that London has a very high concentration of low income households compared with the national average.

Percentage of secondary school pupils eligible for Free School Meals

This chart shows the range of attainment outcomes in London secondary schools, broken down by Free School Meal Band and compared with other City Challenge areas. A full explanation of this chart is available in Annex 1.

Annex 1

What it all means – footnotes and explanations

How have families been grouped

Schools are grouped into families based on an average of prior attainment data and context data. Prior attainment data is the Average Key Stage 2 (KS2) Point Score (APS) for all pupils in Year 7 to Year 11 matched to Key Stage 4 data. Context data includes:

- Income Deprivation Affecting Children Index (IDACI) data, calculated by linking individual pupil postcodes to IDACI data and compiling an average figure for each school¹.
- The proportion of pupils eligible to receive Free School Meals (FSM).
- The IDACI and FSM school averages are combined to give an overall indicator for the School Environment (SE).
- The percentage of pupils whose first language is known or believed to be other than English (EAL).
- A mobility measure, defined as the percentage of pupils in Year 10 or Year 11 who have joined the school within the last 2 years (L2Y).

Schools are grouped into families on the basis of all four factors. The factors are used in proportion to their impact upon Key Stage 4 (KS4) outcomes, with weightings being:

- APS (66%)
- SE (20%)
- EAL (10%)
- L2Y (4%)

When developing the 2011 families an overall aim was to retain existing families where possible although some families have changed to accommodate new schools and to allow schools to move families if they had become outliers within their existing family.

An outlier is defined as having a Key Stage 2 APS measure that is more than one standard deviation from the mean Key Stage 2 APS for the family, thus ensuring that all schools within the family differ by less than two standard deviations.

¹ The IDACI is a measure that takes account of different dimensions of deprivation such as housing, education and health. The school IDACI measure reflects the proportion of children living in low income households in the areas that the pupils live in. This is calculated by matching the individual postcodes of children attending each school to the IDACI, which measures the scale of deprivation in each postcode in the country, and compiling an average IDACI figure for each school.

Schools identified as outliers within their existing families, together with new schools, were then allocated to families using the following process:

- An overall score for each school was calculated using the weightings outlined earlier.
- Schools that needed a new family were then allocated to the same family as the schools with the overall score closest to their own.

Following this allocation process, a small number of schools remained as outliers on Key Stage 2 APS within their allocated family and where possible, manual adjustments were made to reduce the number of outliers.

Contextual families

Contextual families bring together schools in London with the highest proportion of mobile pupils and highest proportion of pupils with English as an Additional Language (EAL), enabling schools to compare themselves and share their experiences with others, in a similar way to the main families. Schools within these families also tend to have similar Free School Meal and prior attainment statistics. The creation of these families simply recognises that schools providing for large proportions of pupils with these characteristics are likely to share some issues and experiences, and may benefit from making links with other similar schools.

London in context

The tables and charts on these pages show how the City Challenge areas compare with the rest of England. This data helps set the information presented about each school and each family in the national context. Unless otherwise stated the national data is an average for England and the coverage for the tables and charts is all maintained mainstream schools including CTCs and Academies, which had at least one pupil taking Key Stage 4 tests in 2010. Figures for City Challenge areas refer only to those schools in the Families of Schools. All averages are weighted averages.

The chart titled 'Attainment by Free School Meal band' shows the range of attainment outcomes in secondary schools in each City Challenge area, broken down by school Free School Meal (FSM) band. Here is a guide to interpreting this chart:

- The first blue box on the chart (and the whiskers at the top and bottom of the box) show the full range of KS4 attainment outcomes for London secondary schools with low FSM rates (schools with less than or equal to 5% of pupils eligible for FSM).
- The line in the middle of the blue box shows the median KS4 attainment for London schools in this FSM band (if you ranked all schools in this FSM band on the basis of their KS4 attainment, the median school would be the school exactly in the middle of the list). Although not strictly an average, it is often referred to as the average KS4 attainment for this group of schools.

- The top of the blue box represents the KS4 attainment for the London school on the upper quartile (25th percentile) of the ranked attainment distribution.
- The bottom of the blue box represents the KS4 attainment for the London school on the lower quartile (75th percentile) of the ranked attainment distribution.
- The top point of the whisker marks the KS4 attainment of the school on the 5th percentile of the ranked KS4 attainment distribution and the bottom of the whisker below the blue box shows the KS4 attainment of the London school on the 95th percentile of the ranked KS4 attainment distribution within this FSM band.
- Box and whisker plots for regions are not shown on the chart if there are less than 5 schools in the school FSM band for that region.
- The chart highlights that, for example, in the lowest FSM band Greater Manchester secondary schools tend to have higher KS4 results but a narrower range of results compared to London secondary schools.
- Looking at the national data (the white boxes with red frames), the chart also shows a wide range of outcomes for schools with very high FSM rates. The top whisker on the box at the far right of this chart (in the FSM>50% group of schools) shows that there are some schools with very deprived intakes performing better than schools with relatively low levels of deprivation.

New opener

These are new schools or they are established schools that opened as new academies between January 2009 and January 2010.

Prior attainment band

For each school, the prior attainment of pupils has been calculated by looking at the Key Stage 2 attainment of pupils matched to pupils' Key Stage 4 outcomes in the last 3 years (2008 to 2010). In calculating prior attainment we have taken account of Key Stage 2 (KS2) test marks to calculate 'Fine Grades' since this approach provides for differentiation within National Curriculum (NC) levels. Fine grades use the underlying marks data to create a finer measure. Where in the past, point scores have been based on the levels that pupils achieved in Key Stage assessment, fine grades take account of the minimum mark, mid point achievement and marks that just missed the level above.

The actual prior attainment data is not presented here in the Families of Schools document but each school has been allocated to a prior attainment band as follows:

- Band 1 – Schools with KS2 APS greater than or equal to 0 and less than 23
- Band 2 – Schools with KS2 APS greater than or equal to 23 and less than 24
- Band 3 – Schools with KS2 APS greater than or equal to 24 and less than 25
- Band 4 – Schools with KS2 APS greater than or equal to 25 and less than 26
- Band 5 – Schools with KS2 APS greater than or equal to 26 and less than 27
- Band 6 – Schools with KS2 APS greater than or equal to 27 and less than 28

Band 7 – Schools with KS2 APS greater than or equal to 28 and less than 29

Band 8 – Schools with KS2 APS greater than or equal to 29 and less than 30

Band 9 – Schools with KS2 APS greater than or equal to 30 and less than 100

Percentage of pupils known to be eligible for Free School Meals

This data shows the percentage of pupils on the school roll who are eligible to receive a Free School Meal (FSM). This data was collected in the 2010 Pupil Level Annual School Census (PLASC). The figures are based on all current full-time or mainly enrolled pupils.

Each school has been allocated to a Free School Meal (FSM) band as follows:

Band 1 – Schools with greater than or equal to 0% and less than 5% of all pupils eligible for Free School Meals

Band 2 – Schools with greater than or equal to 5% and less than 9% of all pupils eligible for Free School Meals

Band 3 – Schools with greater than or equal to 9% and less than 13% of all pupils eligible for Free School Meals

Band 4 – Schools with greater than or equal to 13% and less than 21% of all pupils eligible for Free School Meals

Band 5 – Schools with greater than or equal to 21% and less than 35% of all pupils eligible for Free School Meals

Band 6 – Schools with greater than or equal to 35% and less than 50% of all pupils eligible for Free School Meals

Band 7 – Schools with greater than or equal to 50% and up to a 100% of all pupils eligible for Free School Meals

Band 8 - Grammar schools

NB - Bands 1 – 7 exclude Grammar Schools

The ethnic origin of pupils

This data shows the ethnicity of all pupils of compulsory school age and above in each school. This data was collected in the 2010 Pupil Level Annual School Census (PLASC).

Due to the very small numbers of pupils from the Gypsy/Roma and Traveller of Irish Heritage groups, these pupils have been incorporated into the Any other White Background category. Data is not shown for schools where there are fewer than five pupils in a category.

Pupil characteristics data

Data showing the pupil characteristics below has been taken from the 2010 Pupil Level Annual Schools Census (PLASC).

- Percentage of pupils on roll whose first language is known or believed to have English as an additional language (EAL).
- Percentage of pupils on roll with Special Educational Needs (SEN) with Statements or on School Action Plus.

- Percentage of pupils on roll with statements of Special Educational Needs (SEN) at School Action level.

Specialism

If a school is a Specialist School, the subjects that the school specialises in are shown in this column. The data presented in this document refers to schools that were operational as specialist schools in September 2009.

Key to specialisms

A = Arts

AL = Applied Learning

B&E = Business & Enterprise

E = Engineering

H = Humanities

L = Language

LEPP = Leading Edge Partnership Programme

LPS = Leadership Partner School

M&C = Mathematics & Computing

Mu = Music

RAP = Raising Achievement Partnership

RATL = Raised Achievement/Transforming Learning

SC = Science

SEN BES = Special Educational Needs Behaviour, Emotional, Social Difficulties

SEN C&I = Special Educational Needs Communication and Interaction

Sp = Sports

T = Technology

TS = Training School

YST = Youth Sport Trust School Consultant Programme

N/A = Missing Specialism

- = No specialism

School performance data

The data in this document is consistent with that published in the Secondary School Achievement and Attainment Tables (but it is post-errata data). GCSE attainment was previously based on the achievements of pupils in their final year of compulsory schooling (i.e. those aged 15 at the start of the school year). The 2008 to 2010 Tables have been based on all pupils at the end of Key Stage 4, that is, those pupils who were in Year 11 in the school year. This is the year group in which pupils normally take their exams. Although most pupils in Year 11 are aged 15 at the start of the school year, in some schools there are younger and older pupils in this year group, as different pupils progress at different rates. The Tables now report the achievements of pupils at the end of Key Stage 4, regardless of their age, to allow for different rates of learning.

Qualifications covered

From 2007 onwards the data is based on a wider range of qualifications which are based on a different point scoring system. GCSE and equivalent

qualifications include results in all Level 1 and Level 2 qualifications that are approved by QCA as appropriate for pre-16 pupils.

GCSE and equivalent results

GCSE and equivalent results show achievements in all qualifications approved for pupils of compulsory school age. This includes GCSEs, vocationally related qualifications, NVQs, Entry Level qualifications and GCE/VCE AS level qualifications taken early. From 2006 graded exams in such subjects as Music, Dance and Speech and Drama are also included.

GCSE and equivalents Average Point Score

The Average total Point Score provides a fuller picture of the achievements of pupils of all abilities. Two schools with similar percentages of pupils achieving Level 2 or Level 1 thresholds may have different Average Point Scores. The Average total Point Score (APS) is calculated by dividing the total number of points achieved by pupils at the end of KS4 by the number of pupils on roll at the end of KS4.

Contextual Value Added

Contextual Value Added (CVA) aims to take account of other factors that are related to the progress that pupils make in a school, such as levels of deprivation or Special Educational Needs (SEN). The CVA models include the following attainment and contextual factors:

- Pupil prior attainment
- Gender
- Special Educational Needs
- First language
- Ethnicity
- Measures of deprivation
- Measures of pupil mobility
- Age
- An 'In care' indicator
- Average and range of prior attainment within the school.

Mobility measures

This data shows, respectively, the percentage of 15 year old pupils in the school that have been on roll for:

- Five years or more
- Two years or more.

Total absence

The percentage of the total possible sessions (half days) missed due to absence (authorised and unauthorised).

Percentage persistent absence

The percentage of pupil enrolments who are persistent absentees. Persistent absentees are defined as having more than 63 sessions of absence (authorised and unauthorised) during the year, typically over 20 per cent overall absence rate.

Annex 2

School contact details

The following contact details have been sourced from Edubase. If your school's details are listed incorrectly here, it means they will be listed incorrectly on Edubase. Please ensure that the most up to date contact details for your school are registered on Edubase, and updated when necessary.
